This book is primarily written for graduate, undergraduate, and master's students preparing for various competitive examinations all over the world. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help students prepare for competitive examinations, seek admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying ECONOMICS. It contains more than 15348 questions from the core areas of ECONOMICS. The questions are grouped chapter-wise. There are total 1 chapters, 52 sections and 15348 MCQ with answers. This reference book provides a single source for multiple choice questions and answers in ECONOMICS. It is

intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.
