"I Get It!" moments. Management and cost accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for cost accounting and management accounting. Management Accounting is becoming increasingly international. "Management and Cost Accounting" is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level (Bachelor, but also suited for MBA courses due to strong focus on practical applications and cases). This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting. After an introduction to the topic, including major differences between the German approach and the purely Anglo-Saxon approach of management accounting, the book describes different cost terms and concepts applied in German cost accounting, The book is much more specific here compared to US-American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The

heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard: It starts with cost type accounting, moves on to cost center accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost-volume-profit analysis (break-even-analysis) is covered. The book closes with a comprehensive treatment of cost planning and variance analysis. With its tried-and-true framework and respected author team, Horngren/Harrison/Oliver's Accounting when combined with MyAccountingLab is the trusted choice for instructors and students of Principles of Accounting. To package MyAccountingLab with Accounting, order ISBN 0132785862. Financial Statement Analysis; Introduction to Management Accounting; Job Order and Process Costing; Activity-Based Costing and Other Cost-Management Tools; Cost-Volume-Profit Analysis; Short-Term Business Decisions; Capital Investment Decisions and the Time Value of Money; The Master Budget and Responsibility Accounting; Flexible Budgets and Standard Costs; Performance Evaluation and the Balanced Scorecard MARKET: For anyone interested in learning the principles of accounting. Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods. An essential and intuitive treatment of financial accounting with an international perspective The use of International Financial Reporting Standards is growing rapidly, both outside of the United States and within, especially as IFRS incorporates more US GAAP rules. In the newly updated fifth edition of Financial Accounting with International Financial Reporting Standards, a team of accomplished financial practitioners and educators delivers the newest version of their highly anticipated text. This important work offers practical end-of-chapter exercises and practice

problems complete with foreign currency examples, as well as an emphasis on non-US companies and examples. It is perfect for accounting students seeking exposure to internationally utilized accounting standards. This book brings together examples of leading thinking and international practice in the rapidly developing area of environmental management accounting (EMA). The authors include academics and practitioners from industry and the subjects covered range from individual company experiences with implementing EMA to national experiences regarding the adoption and diffusion of EMA practices. "Introductory Financial Accounting, 9e" provides a unique and perfect blend of robust financial statement analysis with early statement of cash flows coverage. It is directed at those who will analyze real financial statements, and make business decisions based upon that analysis. Real statements are used throughout (Starbucks). Statement of Cash Flows comes earlier in this book than most. Material is focused on analysis of financial statements -- ratios introduced early and often, special "Portfolio" section provides a "road map" to financial statement analysis, and special section in end-of-chapter problems focuses on analyzing financial statements (using Starbucks financial statements). Features strong coverage of statement of cash flows (Ch 5) -- an essential financial statement, one of growing importance, and should be regarded as a basic statement. For financial accountants. Extraordinary and up-to-date problems have been added to this edition with other new features including text learning aids to help students understand accounting and streamlined text discussions for more effective understanding of core
